### **Abstract:**

It is true that, to develop an economy of any country resources plays a vital role, because it flourishes the country's economy and uplifts that country who's having resources in an abundant manner, but if that resources are mobilizing properly then it would be happened or else that country undergoing financial crises which brings down its GDP rate drastically. In wake of this issue it is quite difficult for those countries who are yet confronting in developing phase. Thus, to overcome on such situation every constituents which are responsible for keeping economy healthy in respect to utilizing each and every element such as resources keeps that country front foot. To understand the meaning of resources it consists of stock, money, material drawn by a person to his organization for effectively functioning the activities. It is about basic jargon, but when a question arises about making proper utilization of resources that somewhat tricky and knee jerking task. Economic growth trajectory in lieu of maintaining resources in an optimum way .Therefore, plight on this issue is an important aspect so that, whatever the elements comprising without stimulate this matter of concern it would not be possible to achieve double digit growth in every spheres of economic activities

Keywords: Knee jerking, GDP, Mobilization, Constituents.

### **Introduction**

Mobilization of resources means the freeing up of locked resources. Every country has economic resources within its territory known as domestic resources. But often they might not be available for collective use. The percentage of resources used when compared to the potential is often very every country has economic resources within its territory known as domestic resources. But often they might not be available for collective use. The percentage of resources used when compared to the potential is often very low. For a country to grow, identification and mobilization of its resources is necessary. It should be available for easy use and for central and state level. Resources are classified into two group's i.e... Natural Resources, Human Resources. As far as concerned about proper channelization of this resources between state as well as central provinces having required synchronization and harmonization in terms of sharing and distributing resources in equal proportion . In present scenario of revival growth of every country, especially focusing Indian economy vicious cycle seemed. In our nation state to state empowerment vested them in accordance with constitutional and democratic system.

Moreover, notwithstanding as and when a specific political parties modus operandi while doing so somewhere chaos occurred ,but dependent variables are highly suffered due to rift in respect to their perception . Every state has autonomy to decide what to do and not to do. So under this situation distribution and sharing of resources can be a big detrimental issue comes across.
