Energy Conservation Policy

Preamble:

To promote environmental consciousness and holistic development of students, Balbhim College, has adopted Energy Conservation Policy for an "Environment of educational excellence." The institution aims to realistically and comprehensively reduce energy consumption, assure acceptable indoor air quality and improve energy efficiency on campus through methods that are consistent with a safe, secure, and Eco-conscious campus community. As outlined in this policy, energy conservation will be accomplished by developing a proactive and progressive approach to providing energy efficient, responsible, and cost- effective operations on campus.

Applies to:

Faculty, staff, students and visitors.

Energy Conservation Practices:

- Our Energy conservation practices include the College replacing all tube lights with LED tubes, LED bulbs being the most energy efficient lighting option. LED tubes use 75% less electricity than incandescent tubes (Energy Star). LED tubes last about 25 times longer than traditional incandescent tubes. 100 percent of lighting requirement is met through LED.
- Energy conservation practices and eco-friendly habits are inculcated among students and staff through cautioning them about simple things

Principal

**Balbhim College of Arts, Science
& Commerce, Beed
District Beed-431122**

which are really effective to reduce Electricity Consumption like students and staff turning off all lights, appliances and electronics not in use.

Raising Awareness on Energy Conservation:

Sustainability efforts, energy savings, and greenhouse gas inventory metrics are all high priorities to a college and more importantly, to our students. When engaging in a master energy plan or energy savings renovation project, there is an excellent opportunity to build student support around campus sustainability. Energy improvements occur mostly out of sight so raising awareness of these projects can hold real benefits, including encouraging desired behavior on how a campus building can and should be used to contribute to a college's carbon footprint reduction goals. Rising utility rates are generally a fact of life. Just like inflation, the cost of electricity, gas, and water will go up a few percentage points each year. Whether all at once or over time, utility rate increases can wreak havoc on the operations budgets for the college.

Save Energy TIPS to be followed:

1. Activate power management features on computer and monitor so that it will go into a low power "sleep" mode when the students and staff are not working on it.
2. Turn off the monitor when the students and staff leave the table.
3. Activate power management features on laser printer.
4. Whenever possible, shut down rather than logging off.
5. Turn off unnecessary lights and use daylight instead.
6. Avoid the use of decorative lighting.
7. Use LED or compact fluorescent bulbs.
8. Keep lights off in CFC halls, classrooms, auditorium halls when they are not in use.
9. Use the fans only when they are needed.

Waste management Policy

Policy Statement:

The College will adopt the principles of the 'best practicable environmental option' in the delivery of its waste management services. The College will apply a 'waste hierarchical approach', to reduce, reuse, recycle and recover waste products in preference to the disposal of waste to landfill. The College recognises the importance of meeting these legal requirements and to manage its waste responsibly, reduce the volume of waste sent to landfill and maximize reuse and recycling where possible. The College requires all the teaching and non-teaching staff, students, guests and anyone else making use of the premises to comply with this Policy and associated "College Environmental Guidance" to ensure compliance with all waste legislations. Any solid waste generated in the campus shall be managed and handled in accordance with the compliance criteria and the procedure laid down in Municipal Solid Wastes.

Policy Objectives:

The objectives of this policy are:

- To ensure that waste management is performed in accordance with all waste legislative requirements, including the duty of care, and to plan for future legislative changes and to mitigate their effects.
- To minimize waste generation at source and facilitate repair, reuse and recycling over the disposal of wastes in a cost effective manner.
- To provide clearly defined roles and responsibilities to identify and co-ordinate each activity of the waste management. To promote

environmental awareness in order to increase and encourage waste minimization, reuse and recycling.

- To invest into the expansion of recycling opportunities on the College campus and transform waste into value added products.
- To ensure the safe handling and storage of wastes on College campus.
- To provide appropriate training for teacher, resident, staff, students and other stakeholders on waste management issues.
- To promote holistic approach of waste management in the campus.

Hazardous Waste Management's:

Standard procedures are followed by Departments for handling and disposal of hazardous waste. The college does not offers courses using chemicals end compounds with high risk of intensity and side effects.

In college canteen we use glass cups and stainless steel plates for tea and snacks respectively due to these plastic and paper cups are avoided. Cigarette smoking is strictly banned in the college campus.

E-Waste Management:

An e-waste collection drop box for collecting small sized electronic waste has been kept in the main corridor of main building students and staff deposit used e-waste into it. Institute takes the help of professional agencies for proper disposal of the waste.

Water Conservation Report

Rooftop Rainwater harvesting in administrative building

Rooftop rainwater harvesting is a process to store rainwater on the roof catchment and send it to the reservoir for various uses. In this process of capturing rainwater, it has very easy to collect the rainwater because the roof has on the top of the building so it can collect most of the water and then send it to the reservoir. We collect the rainwater by pipe and it is used for bore well recharge.

1. Green Policy of institute:

Introduction:

The future of humankind depends very much on our ability to change our lifestyles and agree to follow a low consumption pattern of living in terms of resources taken from the globe and return to a sustainable development path at the earliest. Climate around the world – in developed as well as developing reGeons – has started showing violent changes, destroying life and property and annihilating peaceful living conditions.

The opportunity window for restoring nature to its prolonged state of hosting life forms to flourish under its caring environs is according to scientists, very short and lasting only up to 2030. Within this time, with the willing actions of every citizen wherever they are, coordinated and directed actions should start and continue thereafter till a balancing stage is reached where moderate use of resources and mitigation actions for healing the hurts already inflicted, balance positively to a sustainable nature. If we do not start action now, the situation may go out of control and when our grandchildren reach adulthood, their chances of survival will be very bleak.

Life expectancy of those few who survive will be much shorter than what we have now. This is something we all agree to avoid. The students who are in schools and colleges now are to be the enlightened leaders of immediate tomorrow. Our national educational authorities, as in most developed countries, therefore insist that every student in our country should learn how damages to the environment occur and how to avoid such situations, emphasizing more on possible remedial measures. This green education should start from schools and colleges, and the insistence on Green Audit of higher education institutions on an annual basis, is to make students and staff well informed of the extent of ecological footprints each one creates, as well as on which areas one should concentrate to make his or her environs greener than before.

The Green Policy of Balbhim Arts, Science and Commerce College, Beed is prepared in such a manner that it can educate every stakeholder of the institution, on the major contributors tending to destroy and on every step helpful to restoration leading to further flourishing of its green status.

Principal

Balbhim College of Arts, Science
& Commerce, Beed
District Beed-431122

Policy:

The College is committed:

- To improve energy efficiency and reduce energy consumption associated with domestic and other college activities, including lighting, air and water heating and refrigeration. It will also take account of the concept of embodied energy where it is pertinent to purchasing policy and waste management.
- To minimize consumption of water, energy and materials; to consider the cradle-to-grave impact of all products and services purchased, giving preference to those which, not incurring excessive cost, attempt to minimize their environmental impact. To encourage suppliers to provide the College with environmentally friendly goods and services.
- To embrace the Precautionary Principle in the use of chemical products, such as domestic chemicals, detergents and pesticides. This refers to known hazards controlled under health and safety regulations, as well as unknown hazards to health and the environment.
- To reduce material and organic waste and to facilitate the reuse and recycling of paper, glass, aluminum, plastics and organic refuse generated by College activities, using the most environmentally effective means.
- To promote an awareness of environmental issues in and outside the College Campus and to encourage participation of all stakeholders in environmental matters.
- To continue to invest a proportion of its capital on the basis of ethical and environmental criteria and to adjust that proportion as financially appropriate for the College.

Objectives:

- To secure the environment and cut down the threats posed to human health.
- To make sure that rules and regulations are taken care of
- To avoid the interruptions in environment that are more difficult to handle and their correction requires high cost.

- To suggest the best protocols for adding to sustainable development
- To promote the Environment Management and Conservation in the College Campus.
- To identify, quantify, describe and prioritize framework of Environment Sustainability in compliance with the applicable regulations, policies and standards.

Benefits:

- It would help to prepare plan to protect the environment.
- Recognize the cost saving methods through waste minimization and management.
- Point out the prevailing and forthcoming impacts on environment.
- Ensures conformity with the applicable laws.
- Empower the organizations to frame a better environmental performance.
- It portrays a good image of an institute which helps building better relationships with the group of interested parties.
- Promotes the alertness for environmental guidelines and duties.

POLICY FOR PERSONS WITH DISABILITIES

1. Introduction:

Right of Persons with Disabilities Act, 2016 prohibits discrimination against individuals with physical and mental disabilities. Balbhim Arts, Science and Commerce College, Beed is against all Kinds of discrimination on any grounds including disability. Balbhim Arts, Science and Commerce College, Beed intend to advance a comprehensive and inclusive teaching and learning environment in which incapacitated students and employees are not distraught or treated unfavorably. The institute aims to design its programs, administrations, and activities accessible to the students. All the authorities of the institute are striving in order to extending a helping hand towards the differently abled so as to make sure about the Benefits of grounds programs, administrations, and activities. These guidelines apply to all the Institute Faculty and staff.

2. Objectives of the Policy

- To create Inclusive Culture to avoid discrimination, exploitation and exclusion of Disable Students and Staff from all spheres of work and education.
- To create suitable regulatory mechanism for effective delivery of services to Disable Students and Staff of the institute
- To ensure implementation of all legislations with respect to persons with disabilities.
- To provide accessible and inclusive education at the institute.
- To ensure full participation of persons with disabilities and to provide them the equal opportunities for development.
- To provide necessary budget allocation to achieve above objectives.
- The terms used in the policy have meaning mentioned in chapter I of the rights of the persons with disability Act 2016.

3. Disability:

Disability is a term that includes motor and sensory limitations (e.g., mobility, vision, or hearing impairments). Many disabilities vary in degree and type of limitation; therefore, accommodations must also vary and should be tailored to the needs of the individual.

4. Accessibility of Resources:

Principal
Balbhim College of Arts, Science
& Commerce, Beed
District Beed-431122

Providing access means making all the University services, activities and the benefits thereof, fully available to qualified people with disabilities. The institute should provide various provisions in creating a disabled friendly campus. The institute administration and faculty members should ensure appropriate/reasonable accommodations for each person with a disability, and be willing to resolve access problems. The campus should be barrier free and accessible for persons with differently able. The following principles of accessibility will be strictly observed:

- All UG and PG programs and activities must be accessible.
- To provide accessible textbooks and study material to all students with disabilities.
- To ensure the awareness programmes for all the teachers and non-teaching staff regarding the issues of accessibility.
- To ensure that web services are compliant to National and international accessibility standards and regulations such as Web content Accessibility Guidelines WCAG with appropriate version and Government of India Guidelines for Web accessibility.
- Admission policy of the Institute offers 5% reservation for persons with disabilities in all the courses offered by Institute. The institute will ensure the representation of all the types of disabilities listed in Rights of Persons with Disabilities 2016 and as per government regulations from time to time.

5. Help in Examination for Disabled students:

Balbhim Arts, Science and Commerce College, Beed will make reasonable changes in the educational plan and assessment framework to meet the particular needs of students with disabilities. Sensible convenience will be made to meet the necessities of the considerable number of Students with disabilities. The guidelines and regulations has been issued by the examination department for use scribe in exams.
